

## Education and Certifications

---

- **B.Sc. Computer Science**, University of Bucharest. **2022 – Present**
- **Mathematics and Informatics**, Liceul Teoretic George Calinescu **2017 – 2021**

## Technologies and Languages

---

- Languages: Python, C/C++, Java, Haskell, SQL, HTML, CSS, JavaScript, PHP
- Technologies: MySQL, Docker, Git
- Other: Data structures, algorithms and object oriented programming

## Projects

---

- **SQL Project:** <https://github.com/radoi17/Proiect-Sgbd>
- **OOP Project:** <https://github.com/radoi17/Proiect-OOP>
- **PHP Project:** [https://github.com/radoi17/Proiect-Php\\_4](https://github.com/radoi17/Proiect-Php_4)

## Interests

---

- Listing interests can be a conversation starter. Don't go overboard on this one though.
- I am an avid masters swimmer and I have read most science fiction novels worth reading.

---

### NOTES FOR THE TEMPLATE:

- **A lot more context in the book.** This template is part of [The Tech Resume Inside Out Book](#), which contains more context, advice and further templates for developer resumes.
- **Order of the sections could be different.** This template is optimized for people with work experience. For students, new grads and bootcamp grads, you'll probably want to move the Education part up, and focus on project work, when you don't (yet) have much work experience.
- **You might want to move Technologies & Languages to the top**, below the summary - depending on the type of companies you are applying for.
- **Use your own colors!** Feel free to change the headers' color from blue to something else. It's nice to give the template personality. Same goes for the font, and even the font size. This is a template that is a starting ground for your resume.
- **To change the color of the section lines**, select the section title, and click "Borders and Shading..." and change the bottom border.
- **Interested in software engineering essays?** I blog about software engineering, and growing as a software engineer at [The Pragmatic Engineer Blog](#). Subscribe to [the newsletter](#) to be notified of new articles and resources like this being published.
